Address to:

Assistant Commissioner for Patents
Washington, D.C. 20231

37 CFR 1.97(b)

1. ☒ The Information Disclosure Statement submitted herewith is being filed within three months of the filing of a national application; within three months of the date of entry of the national stage as set forth in 37 CFR 1.491 in an international application; or before the mailing date of a first Office Action on the merits, whichever event occurs last.

37 CFR 1.97(c)

2. ☐ The Information Disclosure Statement submitted herewith is being filed after three months of the filing of a national application, or the date of entry of the national stage as set forth in 37 CFR 1.491 in an international application; or after the mailing date of a first Office Action on the merits, whichever occurred last but before the mailing date of either:

1. a Final Action under 37 CFR 1.113, or
 2. a Notice of Allowance under 37 CFR 1.311,
- whichever occurs first.

Also submitted herewith is:

- ☐ a certification as specified in 37 CFR 1.97(e);

OR

- ☐ the fee set forth in 37 CFR 1.17(p) for submission of an Information Disclosure Statement under 37 CFR 1.97(c).

INFORMATION DISCLOSURE STATEMENT

October 2, 2000

Hon. Commissioner of
Patents and Trademarks
Washington, D.C. 20231

Sir:

In accordance with the duty of the disclosure, it is respectfully
submitted that in the corresponding RU application the following art was
cited:

US-PS 5 225 965

SU 1780,495

SU 1598,238

The U.S. patent cited in the corresponding RU application was also cited in the search report in the PCT application which has been submitted to the United States Patent and Trademark Office.

Both other references are SU references provided with English-language abstracts.

In the SU 1,780,495, as shown for example in Figure 22, the electrical components 8 which generate heat are arranged on the printed circuit board. They have no direct contact to a housing frame. Moreover, as can be understood from the translation (last line, the heat insulating material is provided for heat withdrawal). The references do not contain any hint or suggestion for features which are provided in the present application, in particular a constructive design by means of a housing frame for heat withdrawal.

As for the SU patent 1,598,238, it shows an electrical device with electrical switching parts, as can be derived from the first line of the abstract. It discloses a "heat pipe" consisting of frame 2, wick 3 and a vapor channel 4. Construction disclosed in this reference is different from the applicant's invention.

Copies of the references are enclosed herewith together with
a list of the references.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Michael J. Striker', with a long horizontal flourish extending to the right.
